Summary

I design and build websites and web applications, then stay close to the work after launch. I've worked directly with clients from scoping to production support, building interfaces in TypeScript and React and handling the APIs, data and hosting behind them.

Skills

- TypeScript, JavaScript, React and Next.js
- HTML, CSS and UI design
- Node.js, PHP and PostgreSQL
- Production hosting and troubleshooting

Professional Experience

Founder / Product Engineer / Systems Lead

Technomancy IT LLC

Present

- Work directly with clients to scope, design, build, deploy and support websites and web applications.
- Build TypeScript and React interfaces along with the APIs and data workflows they depend on.

Senior Systems Engineer / Datacenter Architect

Front Range Internet Inc.

2015 - 2020

- Ran hosted web services, wrote PHP and JavaScript, and worked on billing software and its replacement.
- Built diagnostics and self-service tools for hosting customers and handled production escalations.

Systems / Software Engineer

Office Evolution

2014 - 2015

- Connected customer onboarding and provisioning with internal web tools and built a front-desk interface for routine support.

Network & Systems Engineer

PlumChoice / Everon

2012 - 2014

- Supported small-business networks and endpoints, handled on-call issues and built repeatable diagnostics.

Infrastructure and Systems Focal

IBM

2010 - 2012

• Automated backups and other infrastructure work with Perl, Bash, VBA and PHP.

Selected Projects

Velatis

Completed client work

• Delivered a private research workspace that brought notes, chart interactions and sharing into one web application.

NuPrice

Long-term client product

• Built and operated a seller-facing marketplace repricer, from pricing rules and analytics to subscriptions and support.

Kerf

Independent developer tool

• Built a TypeScript and TSX framework with an interface toolkit, routing and its own compiler.

Education

Front Range Community College

Computer Science coursework

2011 - 2013
